4. The following is an Examiner's statement of reasons for the indication of allowable subject matter:

As in claim 1, the prior art of record fails to teach or fairly suggest a disk apparatus that calculates optimal reproduction laser power by irradiating a laser beam onto data zones of a disk recording medium, comprising:

a specifier for specifying a current linear velocity

Art Unit: 2627

coefficient on the basis of a current ambient temperature of the disk recording medium and a current linear velocity at a portion data zone to which the laser beam is currently irradiated,

wherein the specifier updates the current linear velocity coefficient by use of a condition relating to the ambient temperature and linear velocity at a specific data zone; and

a calculator for calculating an optimal reproduction laser power value obtained by multiplying the reference reproduction laser power value determined by a determiner by the current linear velocity coefficient specified by the specifier.

The features indicated above, in combination with the other elements of the claims, are not anticipated by, nor made obvious over, the prior art of record.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
